

As a resident of the Thornton, Colorado community I find K-love to be very beneficial. K-Love (91.1 FM here) has been a source of positivity & encouragement to me over the years. If K-Love was not available in my area I feel that many people who also receive the same benefit I find would have to go without. I find that when I'm having a bad day & don't feel like doing anything beneficial for my family, neighbors or community K-love helps me to realize I can make a positive difference where I live. Please don't allow some LPFM broadcaster cause me to loose my K-Love signal as it is very important to me & many others here. The public interest is served by K-Love because it offers important news updates every hour (if not more often) & it's staff pray for our country when it is going through a difficult challenge & they also pray for people in our local community on a regular basis helping residents to feel supported (not only by God Himself) but also by people who care about them. K-Love also has pastors/counselors available to speak with people who are suicidal or who are struggling with making bad decisions. K-Love also is a very safe source of entertainment with contests that winners in my area (I've been one of them) get to enjoy the benefits of such as music CD's & videos. Thank you for your team & please understand how important this station is to me & to my community.
